

# PHOTOGRAPHY CLUB

Photography Club is a cross-curricular activity combining the skills of Art and ICT. It promotes creativity and imagination, as every week a new topic is chosen for the students to interpret. The topics are chosen using Art curriculum guidance to ensure that cross curricular links are maintained. The club runs every Summer term to ensure that we make good use of the better weather. This in itself lends a different interpretation to the topics given.

We have focused recently on topics such as Spring, Manmade objects and Reflections and mirror images. The students have shown great skills in their camera work and after half term students will experience focused skills workshops to develop and expand on their knowledge.

We hope you enjoy viewing the students work.
